

# Initial Arriving Fentanyl Guidance

Assuming Product is Visible

Fentanyl Present	Skin Protection	Face Protection
Small Amount	<ul style="list-style-type: none"><li>• Nitrile Gloves</li></ul>	<ul style="list-style-type: none"><li>• P100 Filter</li><li>• Goggles or Full-facepiece mask</li></ul>
Bulk Amount or Distribution	<ul style="list-style-type: none"><li>• Nitrile Gloves</li><li>• Long Sleeves</li></ul>	<ul style="list-style-type: none"><li>• Full-facepiece APR w/ P100 Filter</li></ul>
Milling Lab High Hazard	<ul style="list-style-type: none"><li>• EPA Level C</li></ul>	<ul style="list-style-type: none"><li>• Full-facepiece APR w/ P100 Filter</li><li>• Or, SCBA</li></ul>
Production Lab High Hazard	<ul style="list-style-type: none"><li>• EPA Level B</li></ul>	<ul style="list-style-type: none"><li>• Full-facepiece CRBN APR</li><li>• Or, SCBA</li></ul>

Taken from: *The Interagency Board Recommendations on Selection and Use of Personal Protective Equipment and Decontamination Products for First Responders Against Exposure Hazards to Synthetic Opioids, Including Fentanyl and Fentanyl Analogues*

# General Response Guidelines

- Minimize aerosolizing of dusts
- Remove gloves and face protection LAST
- Thoroughly wash all exposed skin with copious amounts of water, then use soap and water when available.
  - Do not use waterless skin sanitizing products!
- Decon contaminated equipment with
  - Dahlgren Decon solution
  - a 5% solution of peracetic acid
  - a 10% hydrogen peroxide
  - a 12% dichlor/trichlor solution (dichloro- or trichloroisocyanuric acids)
- **DO NOT ENTER SUSPECTED LABS WITHOUT HAZMAT TECHNICIANS**
